

Kit Huff

Software Engineer

Creative, adaptable software engineer with a passion for design. Achieves consistent positive feedback in the creation of front and back-end web applications. Looking for an international company where I can bring my skills.

EXPERIENCE

100devs, Los Angeles, CA — Software Engineer

June 2021 - PRESENT

Building semantic, accessible full-stack web applications

Working alongside a team of fellow developers using best practices to create responsive web applications.

Recent Projects:

Coffee Shop (Fullstack Web App) - Allows orders from customers along with their names. Employees can use the app to organize workflow and mark orders complete along with the name of the one who made it.

Van-Pires Lost Media Archiving (Fullstack Web App) - Allows users to interact with others in message boards and create lists of older shows to watch/find/research. Can access research material and updates on the search for lost media.

Kit's Designs, Chicago, IL — Software Engineer

February 2023 - PRESENT

Designed and created static websites and full-stack web applications for varied clients in small and medium businesses.

Provided consultation on SEO, social media approach, and design elements. Clients include:

Menna Company(Fullstack Web App) - Provides the ability for the artist to display their work and sell pieces to customers. The artist can easily update their artwork and newsletters and stay in contact with customers.

Seoul Department of Education(EPIK), Seoul, SK — Teacher

February 2016 - March 2021

Created language lesson plans for students aged 4-17 and 35-67 for in-person and online classrooms of varying levels of fluency employing explicit teaching practices, dynamic learning, and games.

Helped with any English translation services needed, and provided informative presentations to promote cultural exchange, responsible for English language and cultural classes for fellow teachers and administrators
